

BSA CLASS 2 MEDICAL EVALUATION

(Every 36 months)

A Class 2 record is required once every 36 months for all participants under 40 years of age. Includes any event that exceeds 72 consecutive hours where the level of activity is similar to that normally expended at home or at school, and where medical care is readily available. Examples: resident camping, backpacking, tour camping, and hiking in relatively populated areas.

Note: Some states require an annual pre-camp medical evaluation. Your BSA local council service center can advise you about the requirements in your state.

If your child has had a medical evaluation (physical examination) within the last 36 months, a copy of the results of this examination may be attached to the health history [Class I] for all participants in a camping experience lasting longer than 72 consecutive hours (3 days and nights). If a copy is not available, a physical examination (using below) must be scheduled by a licensed medical practitioner(*). A medical evaluation also is required if your child is currently under medical care, takes a prescribed medication, requires a medically prescribed diet, has had an injury or illness during the past 6 months that limited activity for a week or more, has ever lost consciousness during physical activity, or suffered a concussion from a head injury.
